
URBANA
LUXURY FIREPLACES

OVER 30 YEARS IN HEARTH

Sherwood Industries Ltd. is the manufacturer of Urbana alongside Enviro and has been an industry leading hearth company for over 30 years. Our factory is situated on Vancouver Island in the Pacific North West, where hard work and ingenuity come together to create innovative fireplace products that our customers can enjoy and appreciate for years to come.

THE URBANA ADVANTAGE U30 | U50 | U70

COOL WALL

Fireplaces can be framed in with combustible materials such as drywall, veneer, shiplap, etc.

3D STAINLESS STEEL BURNER

A stunning new three dimensional fireplace design that adds a “wow” factor to your flame.

INVISISEAL SYSTEM *Patent Pending*

The interior glass panes seal to each other using our proprietary Invisiseal System. Invisiseal uses formed silicone for a no-mess, airtight and re-usable glass seal.

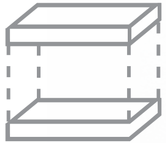

DOUBLE GLASS OR SCREEN

Urbana fireplaces use either a second layer of glass for hot surface protection or alternatively a single layer combined with a removable invisimesh safety screen.

TOP FIREBOX LIGHTING

Adjustable top lights come standard on all Urbana fireplaces and are controlled via an included remote.

NO STEEL PILLARS

Don’t like steel bars? Our bay fireplaces are available with a transparent glass-to-glass construction that lets you enjoy the fire from any angle.

COOL SURFACE SYSTEM

Our Cool Surface System helps channel rising heat within the chase, protecting wall mounted valuables such as paintings or HDTVs.

FIREBOX MEDIA

A large selection of burner media and firebox liners give Urbana units plenty of variation in their flame presentation.

BAY FIREPLACE

By design, the U30, U50, and U70 are built to be installed as three sided Bay Fireplaces, with two methods of hot surface protection. Our dual paned models feature two layers of glass, with airflow in the gap to channel heat away from the outer glass. Alternatively, "Screened" versions trade in the Whisper Flow fans and outer glass for an invisimesh safety screen. Both offer a modern aesthetic and innovative presentation to craft the perfect centerpiece for your home.

SINGLE SIDED INSTALLATION

The U50 and U70 units can be installed flush with the wall using a Single Sided Installation Kit. This option gives the fireplace a traditional linear appearance while retaining its impressively tall *Cool Touch Glass*.

CORNER INSTALLATION

An Urbana Fireplace can be installed in a corner using a left or right corner install kit. All bay units can be easily converted for either corner giving you more creative freedom to design your perfect living room. Please see the part number breakdown to identify the corner kit you need for your install.

FLOATING INSTALLATION

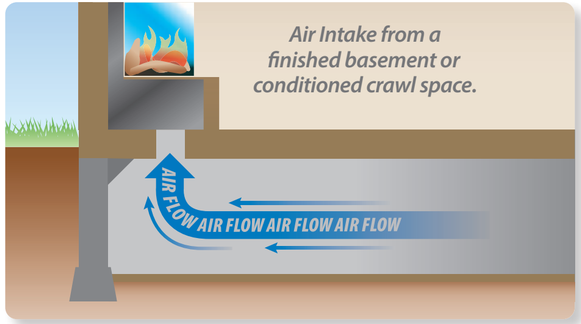

The U30 unit can be installed as a floating design using the Floating Installation Kit. This installation kit gives you more creative freedom with your fireplace to suit your unique vision. This suspended design is built to be a focal point within your home, while providing the cozy and homelike atmosphere that you expect from your hearth product.

U30 | U50 | U70
VENTING SOLUTIONS

Every Urbana fireplace is designed with our COOL SURFACE SYSTEM which allows air coming into the fireplace to be heated and rise up safely within the chase, protecting wall mounted valuables from unsafe temperatures. This gives you the freedom to decorate your room without the worry of heat damage over the long term. Rising heat exits the top of an open chase; however, we have additional venting options if you wish to frame the chase all the way up to the ceiling.

Bottom intake not required for "Screened" bay units.

HIDDEN INTAKE CONSTRUCTION — URBANA EXCLUSIVE

Where approved by local codes and the building's HVAC supplier, the chase intake air may be supplied from a basement or conditioned crawl space below if no visible open area is desired at the bottom of the chase.

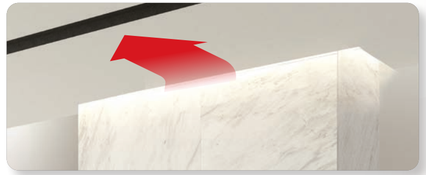

SHADOW LINE

Fans pull air into the unit through a gap beneath the fireplace's "plinth" or "lower construction".

FLOOR VENTS

The "plinth" or "lower construction" is finished to the floor and optional floor vents are installed on the left and right sides to allow for air intake.

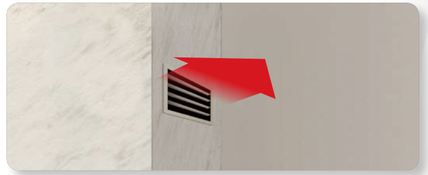

TOP SHADOW LINE

The chase is constructed leaving an open gap at the ceiling allowing rising heat to freely enter the room.

FORWARD FACING VENT

Optionally, you can channel the rising heat through a forward facing vent with a paintable bezel.

SIDE VENTS

Side vents are also available and operate by exiting hot air out the left and right sides of the chase.

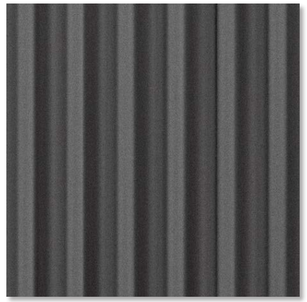

HDTV SAFE

HDTV's are able to be wall mounted as low as 4" from the top of the glass.

TRADITIONAL GAS FIREPLACES

Introducing the U37 and U44 traditional gas fireplaces. These models feature clean, contemporary aesthetics and a wide variety of options allowing you to truly personalize the centerpiece of your room. Offered in a well-known square or eye-catching arched configuration, the U37/U44 can be customized to fit any design. Pair the unit with a traditional log set or a modern glass configuration. No matter what you are looking for, the U37/U44 delivers.

COMPATIBLE WITH MOST FINISHES

The low heat nature of Urbana fireplaces allow you to use a large variety of combustible finishes during framing. Here are some examples.

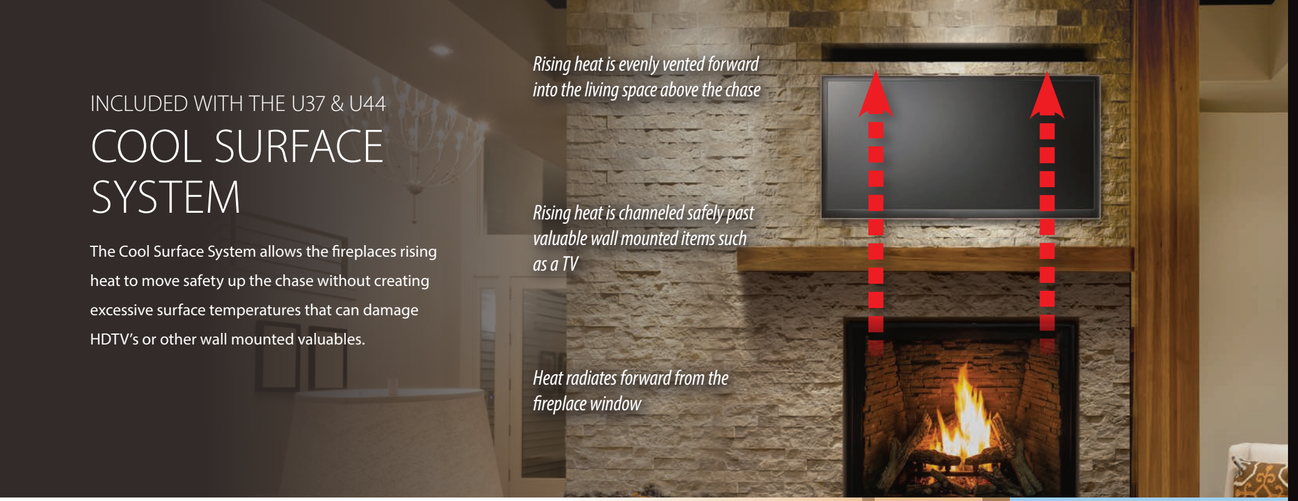

Wallpaper | Drywall | Shiplap | Tile | Fabric | Wood | Imitation Stone | Marble

INCLUDED WITH THE U37 & U44

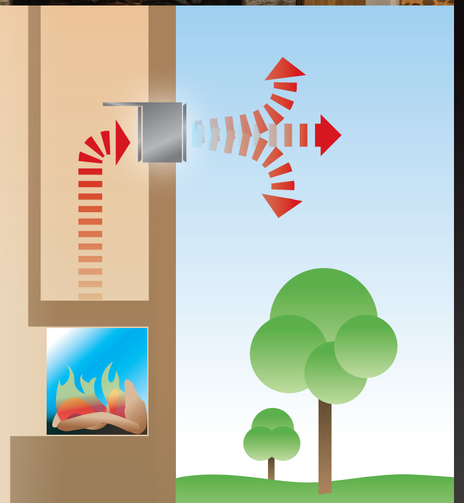

COOL SURFACE SYSTEM

The Cool Surface System allows the fireplaces rising heat to move safety up the chase without creating excessive surface temperatures that can damage HDTV's or other wall mounted valuables.

COMFORT KIT

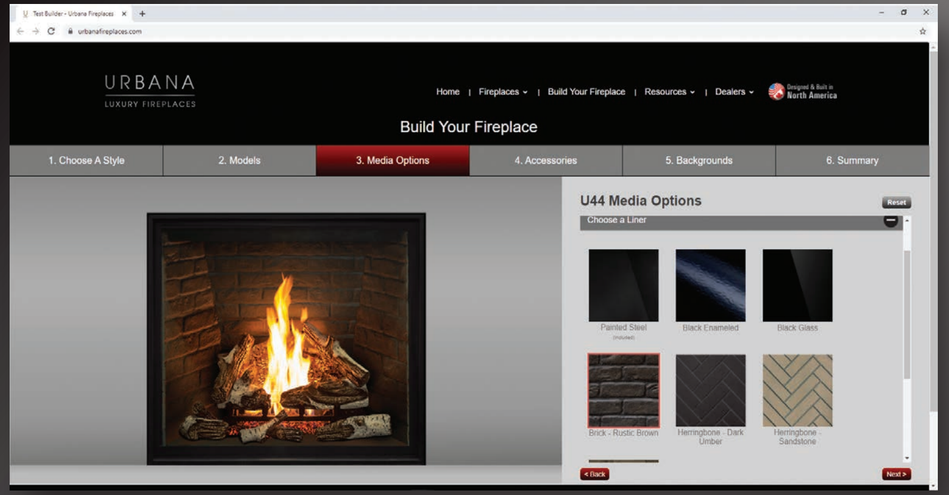

Our available Comfort Kit is an installation option that allows excess rising heat to be channeled outside through an exterior wall behind the fireplace. This setup allows you and your loved ones to enjoy a beautiful flame at comfortable temperatures.

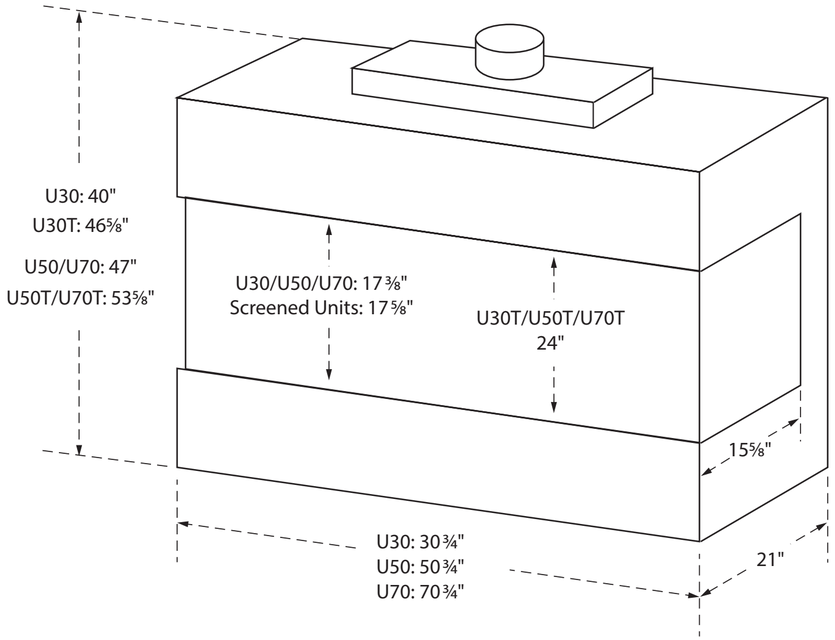

BUILD YOUR FIREPLACE

Find the ideal combination of logs and liners with the Urbana Fireplace Builder. This tool includes the ability for customers to receive a PDF of their fireplace as well as provide a list of authorized dealers in their area.

Visit urbanafireplaces.com/fireplace-builder to build your dream fireplace today
